RCRA-2009
Experimental Evaluation of Algorithms for Solving Problems with Combinatorial Explosion

Proceedings of the 16th RCRA workshop on Experimental Evaluation of Algorithms for Solving Problems with Combinatorial Explosion

Reggio Emilia, Italy, December 11-12, 2009.

Edited by

Marco Gavanelli *
Toni Mancini **

* Università di Ferrara, Dipartimento di Ingegneria, Via Saragat 1, 44100 Ferrara, Italy
** Sapienza Università di Roma, Dipartimento di Informatica, Via Salaria 113, 00198 Roma, Italy

Organized by

the RCRA working group (Rappresentazione della conoscenza e Ragionamento Automatico, Knowledge representation and automated reasoning) of the Italian Association for Artificial Intelligence
Table of Contents

1. Comparing ASP and CP on Four Grid Puzzles
   Mehmet Çelik, Halit Erdoğán, Fırat Tahaoğlu, Tansel Uras, Esra Erdem

2. Applying Simulation and Reliability to Vehicle Routing Problems with Stochastic Demands
   Angel A. Juan, Scott E. Grasman, Javier Faulin, Daniel Riera, Carlos A. Méndez, Bernardo Ruiz

3. Flexible Plan Verification: Feasibility Results
   Amedeo Cesta, Alberto Finzi, Simone Fratini, Andrea Orlandini, Enrico Tronci

4. Improving the Automatic Test Generation process for Coverage Analysis using CBMC
   Damiano Angeletti, Enrico Giunchiglia, Massimo Narizzano, Gabriele Palma, Alessandra Puddu, Salvatore Sabina

5. Advanced Heuristics for Parallel ASP Instantiation
   Simona Perri, Francesco Ricca, Marco Sirianni

6. Evaluation of Knowledge Sharing Strategies in a Parallel QBF Solver
   Paolo Marin, Matthew Lewis, Tobias Schubert, Massimo Narizzano, Bernd Becker, Enrico Giunchiglia

7. An Empirical Analysis of Some Heuristic Features for Planning with Local Search in LPG
   Alfonso Gerevini, Alessandro Saetti, Ivan Serina

8. Efficient Kernels for Sentence Pair Classification
   Fabio Massimo Zanzotto, Lorenzo Dell'Arciprete

9. An Automaton Constraint for Local Search
   Jun He, Pierre Flener, Justin Pearson

10. Constrained Optimization Over Massive Databases
    Toni Mancini, Pierre Flener, Amir Hossein Monshi, Justin Pearson

11. Solving Hypertree Structured CSP: Sequential and Parallel Approaches
    Mohammed Lalou, Zineb Habbas, Kamal Amroun

12. A Hybrid Solver for Large Neighborhood Search: Mixing Gecode and EasyLocal++
    Raffaele Cipriano, Luca Di Gaspero, Agostino Dovier

13. Restoring CSP Satisfiability with MaxSAT
    Inês Lynce and Joao Marques-Silva

14. Negotiation Exploiting Reasoning by Projections
    Toni Mancini

15. **A structural approach to reasoning with quantified Boolean formulas**  
*Luca Pulina and Armando Tacchella*
